Mileage rate beginning January 1, 2019 – 58 cents (\$0.58) per mile

How to use a mileage chart to find the distance between locations:

1. Find your starting location in the left column (in red)
2. Find the location you're traveling to in the top row (in purple)
3. The distance between these 2 locations is where the row and column meet

Example: If you're starting at EAA and traveling to ECM, the distance would be 31 miles, \$17.98 (see diagram below)

1. Starting location in red - EAA
2. Location traveling to in purple - ECM
3. Distance between these 2 locations - 31 miles, \$17.98

<---- Location traveling to ---->
